CAREER OBJECTIVE

Aspiring UI/UX Designer and Python Developer with a strong foundation in Python development, web technologies, UI/UX design, database management, and cloud computing. Skilled in Python, MySQL, HTML, CSS, JavaScript, AWS services and Figma. Experienced in developing web applications, Python-based projects, database-integrated systems, and user-friendly digital solutions. Passionate about combining technical development and design skills to build scalable, efficient, and visually engaging applications while delivering excellent user experiences.

EDUCATION

Bharath Niketan Engineering College, Aundipatti, Theni
B.Tech in Information Technology— CGPA: 8.39/10

June 2021 – April 2025

St. Aloysius Higher Secondary School
Higher Secondary Certificate— Grade: 90.73%
Royappanpatti, Theni

April 2021

SKILLS

Design: Wireframing, Prototyping, User Research, Usability Testing, User Personas, Journey Mapping, Interaction Design, Visual Design, Design Systems, Motion Design.

Technical: HTML, CSS, Java Script, Python, MySQL, Java.

AWS Services: Elastic Compute Cloud, Simple Storage Service, Identity and Access Management, Virtual Private Cloud, CloudWatch and Other services.

Tools: Figma, Git & Github, Vscode, Adobe XD, Photosop, Canva, Uizard, Framer and Miro.

PROJECTS

Yogazone | Fitness Tracking Application:

[View Project](#)

The Yoga mobile application design is a user-friendly digital tool designed to help people practice yoga safely at home with zero equipment needed, while preserving the familiar interface and keeping the experience simple and intuitive.

Healthy | Food Delivery Application:

[View Project](#)

Healthy is a food delivery application that aims to simplify the way users order their favorite meals. The idea behind the app is to create a fast, user-friendly, and visually appealing platform that helps user finds nearby restaurant.

Breast Cancer Prediction:

[View Project](#)

Developed an artificial neural network (ANN) and LSTM-based breast cancer prediction model using Python. Cleaned and preprocessed the Breast Cancer medical dataset, then trained and evaluated the model to achieve highly accurate classification of tumors as benign or malignant.

GemSolar | Enterprise Green-Energy Web Application:

[View Project](#)

Gem solar is a web application for a clean energy vendor delivering sustainable solar solutions. The application provides an engaging platform for residential, commercial, and agricultural users to transition to solar power.

CERTIFICATIONS & INTERNSHIP

AWS Certified Cloud Practitioner | Amazon Web Services (Dec2025)

[View Certificate](#)

- AWS CCP skilled in cloud architecture, cost tracking, and IAM security protocols. Proficient in provisioning core AWS services across Compute, Storage, Databases, and Networking.

Google UX Design Professional Certificate | Google (via Coursera) (Feb2025)

[View Certificate](#)

- Completed a Google-Certified UI/UX Professional course curriculum covering user-centered design, empathy mapping, user research, wireframing, high-fidelity prototyping, and usability testing.

Python Programming Internship | SkillVertex Pvt Ltd (Dec2023)

[View Certificate](#)

- Completed in core development paradigms including data structures, control logic, modular function design, and file handling; demonstrated ability to apply programmatic logic to solve real-world technical problems through hands-on project deployment.

Object-Oriented Programming (OOP) Course | EduPrep (July2023)

[View Certificate](#)

- That helps to developed a strong proficiency in breaking down complex real-world logic into scalable, modular, and highly reusable code structures.

ACHIEVEMENTS

- **Musicc - Music Player Application | Ingage Technologies (May2024)**

[View Project](#)

Won 1st Place in the State-Level UI/UX Design Hackathon organized by Ingage Technologies (2024).

- Demonstrated a strong commitment to academic excellence by consistently securing the second rank across consecutive academic years from 2021 to 2025.
- **Languages:** Tamil, English
